Attn: Mark Shepherd, President
Re: 2008 Performance

Dear Mark:

It was a pleasure to speak with you recently.

As we discussed, we enjoyed our most successful year ever in 2008.

We reached new records in sales, profitability, and size and complexity of systems delivered.

In fact, we resolved a number of complex technological issues which had never before been automated, particularly in the medical industry.

As we reflected upon the key factors in the success of our organization, it became clear that we needed to recognize the contributions of Baity's Precision Machining to our success.

When I first started in 2000, Baity's Precision's assistance was instrumental in the successful launch of my company.

Throughout the years we have counted on Baity's as a key partner, supplying complex machined components.

Robotic automation systems require an increasing number and complexity of machined parts in a wide variety of materials. Throughout the growth of our organization, and our success, Baity's has met every challenge and exceeded my expectations repeatedly.

In the over 9 years of our relationship, Baity's shipped components record has been one of perfect quality assurance and on-time delivery. Baity's has assisted repeatedly in parts design, modification, and refinement.

Since you have purchased Baity's, this performance has continued to improve particularly in the areas of speed and flexibility.

In addition your production, productivity and other recommendations have been greatly appreciated.

I foresee a bright future for us and welcome Baity's ongoing contributions to that success.

It has been a pleasure working with your firm. Please do not hesitate to use me as a satisfied customer reference.

Yours Truly,

M.M., PE
